

CURTIS Cut S 20

Description

CURTIS Cut S 20 is a not water-miscible metal working fluid and used for medium - heavy machining processes.

Technical data

Typical data			
colour:	Light brown	Flash point:	> 160 °C
density (15 °C):	0,91	Cu-corrosion (3h/100°C) :	4
Viscosity (40°C):	24 mm²/s		

Applications

CURTIS Cut S 20 is preferably used for:

operation	materials
machining (turning, milling, drilling, thread cutting, gear cutting, deep hole drilling)	Steels (low + high alloyed),

The product is used as neat oil by conventional supply.

Special features

- ◇ *High performance cutting oil*
- ◇ *Good wear protection for tools*
- ◇ *Wide range of applications*

All data given in this Product Data Sheet are typical of this material. It does not however constitute a specification.
