

CURTIS BioCut 35

Description

CURTIS BioCut 35 is a non water-miscible coolant lubricant and contains synthetic fatty acid esters.

Technical data

Parameter	
colour:	yellow
density (15 °C):	0,94 g/cm ³
Viscosity at 40 °C	35 mm ² /s
Flash point	> 240 °C
Cu-corrosion (3h/100° C)	1

Operational areas / Applications

CURTIS BioCut 35 is a metalworking fluid for light - medium forming/machining operations of steel, aluminium alloys and non-ferrous metals.

operation	materials
forming (bending, stamping/punching/pressing, rolling, etc.)	Steel, aluminium, non-ferrous metals
machining (thread cutting, sawing, etc.)	

CURTIS BioCut 35 is used as neat oil and applied by spray application or by conventional supply.

Special features

- ✓ *High-performance minimum quantity lubricant*
- ✓ *give good wear protection for the tools*
- ✓ *low in odour*
